Another Business Honor for Comtech, OKC's Direct Mail Solutions Experts

Comtech has been named to the 2010 Greater Oklahoma City Chamber of Commerce Metro 50, signifying the fastest growing private companies in the Oklahoma City Metro Area. This is the second year in a row that **Comtech** has made the list, being ranked #3 in 2009.

The Metro 50 is a list of the metropolitan area's fastest growing, privately-owned companies, based on their percentage of annual growth. Metro 50 companies demonstrate positive growth in revenues; growth in the number of employees; creativity/entrepreneurship; and business development through the expansion of facilities, customer base or markets. Qualified companies are required to have revenues of at least \$1 million.

Comtech is a full service, one-stop mail house providing a multitude of associated services such as postal processing (CASS, PAVE, NCOA, MQC, IMB) design, printing, mailing data list, addressing, fulfilment and marketing. **Comtech** is fully capable of handling any promotional project without sacrificing quality, turn times or (most importantly) customer services.

The positive reputation and solid sales numbers **Comtech** enjoys is based on top notch customer service, problem solving, postal regulation expertise and personal attention. Most **Comtech** clients repeat business on a regular basis and most new business comes through referrals or recommendation. **Comtech** is also a 4 time "Best of Business" winner by the OKC Biz magazine.

Comtech helps businesses deliver their message. Congratulations to all of the other Metro 50 winners, especially those who we are proud to say are **Comtech** clients @Link Services LLC, Funnel Design Group, Home Creations, Petra Roofing Co. LLC and Sperry Van Ness.
